Professional Experience

Web Developer Intern   April 2024 – Jul 2024

Canberra Web   Canberra, ACT

- Collaborated with a dynamic team to **design prototypes** and develop high-quality websites and applications using **WordPress**.
- Utilized **JavaScript**, **HTML**, and **CSS** to create visually appealing and user-friendly frontend web designs, resulting in a remarkable increase in website interactions.
- Developed WordPress **themes** to meet specific project requirements, incorporating existing **plugins** and extending the functionality of WordPress.
- Collaborated closely with team members to align work with project requirements, ensuring clear communication and regular progress updates to the supervisor.

Front-end Developer Intern   July 2022 – Oct 2022

Mochi Labs   Canberra, ACT

- Created **customized components** using **React** and **TypeScript,** to improve the Home Page UI.
- Improved features such as drop-down menus, online user integration, and cover additions, leading to increased overall satisfaction with the main page.
- Implemented the **responsive layout** for the visualization function, improving uniformity among different devices.
- Edited and created 30+ mockups using **Figma**. Enable clients to visualize their concepts and ideas.

Sales Assistant and Help Desk Technician   Jul 2023 – Aug 2024

Caseway (Phone accessories store in Gungahlin)   Canberra, ACT

- Provided attentive and proactive service to customers, assisting with product selection, item location, and transaction completion within a friendly environment.
- Handled a range of customer inquiries by clearly explaining complex technical concepts and providing solutions for both software and hardware.
- Coordinated and executed administrative duties, including managing incoming and outgoing mail, answering phone calls, and maintaining organized records.

Projects

Job Scraper APP (Ongoing) [GitHub Repo](#)

- **Situation**: Identified the need for a more efficient method to gather job listings from the ACT Careers and Employment website, aiming to streamline the job search process.
- **Task**: Tasked with developing a web application to automate the scraping of job data, ensuring it could be easily accessed by users.
- **Action**:
  - Developed the application using **Django** and **Python**, focusing on robust scraping techniques to extract job listings efficiently.
  - Implemented **REST APIs** to facilitate smooth data access and integration with front-end applications, enhancing the overall functionality.
  - Deployed the database and backend infrastructure to ensure reliable data storage and retrieval, providing users with up-to-date job listings.
  - Designed user interface mockups in **Figma** to plan the layout and improve the user experience, ensuring intuitive navigation.
- **Result**: Created a functional and user-friendly web application that automates job data extraction, significantly improving the efficiency of job searches for users.

[Personal Blog](#) **(Ongoing)**

- Customized and developed **WordPress** themes, leveraging WordPress core functions, hooks, and filters to implement dynamic layouts and enhanced functionality.
- Created custom blocks and integrated **HTML**, **CSS**, and **JavaScript** to achieve responsive designs.
- Managed full site **setup** and ongoing maintenance on GoDaddy hosting.
